STM Power Transmisson Ltd
Empowering your ideas...

Company Profile

Since 1988, STM Power Transmission Ltd has been providing Industrial Gearbox and Motor solutions to the UK market. During these 22 years we have developed to become one of the UK's leading suppliers, with an enviable reputation for quality and customer service. We like to think we have learnt a thing or two in this time and are confident that we can find a solution for just about any application.

From Micro Gearboxes to Heavy Duty Gearboxes and a comprehensive selection of Motors, STM UK has the product range to deliver.

Any company is only as good as its staff, at STM UK we have a dedicated and experienced team who have been together for many years and have an excellent knowledge of our products. Each staff member is committed to meeting, and where possible exceeding customer expectations.

Here at STM UK we are very proud to be the European 'Quick Reaction Centre' for STM Spa of Italy. We achieve this by stocking many of our products in their component form, allowing us to minimise lead times for complete units, spare parts and on repairs.

The STM UK team has a collective experience of over 100 years in the Power Transmission field so be it for a replacement Gearbox or Motor, a re-design of an existing machine or a solution for a prototype, we are here to help.

Contact us today to see what STM can do for you!
